Projects

⇒ **MEDIA-fi**

HTML, CSS, Bulma, Javascript, JQuery, Giphy API, Spotify API

A collaborative project with Greg Petropolous and Jonathan Drabot with focus on utilizing the Giphy and Spotify APIs. The project goal was to create a web application that will provide song recommendations based off the "mood" of user-selected gifs.

⇒ **Weather Dashboard**

HTML, CSS, Javascript, JQuery, Moments.js, Open Weather Map API

A single page weather web application made using the Open Weather Map API. The goal of the project was to create an application that will generate current and five-day forecasts for any city a user searches for.

⇒ **Password Generator**

HTML, CSS, Javascript

A password generator made using vanilla Javascript. Based on user approved criteria, a password containing random characters is produced.
