- ⇒ Heroku
- ⇒ Git

Projects

⇒ **Chatterbox**

HTML, CSS, Javascript, Handlebars, Node JS, MySQL, Sequelize, AOS, Heroku

A full stack application that allows users to make posts and chat in forums. Login and session authentication allows users to sign up for the application and create posts that they can always access, edit, or delete as long as they are logged in.

⇒ **MEDIA-fi**

HTML, CSS, Bulma, Javascript, JQuery, Giphy API, Spotify API, Heroku

A collaborative project with Greg Petropolous and Jonathan Drabot with focus on utilizing the Giphy and Spotify APIs. The project goal was to create a web application that will provide song recommendations based off the "mood" of user-selected gifs.

⇒ **Note Taker**

HTML, CSS, Javascript, Node JS, Express, Heroku

A note taker application that relies on CRUD operations that runs from a local server made using the Express package through Node JS.
